

Chart 1. SGRO LN, which continues its move lower towards my 854 target.

Chart 2. SBBB SS also no signs that a low is yet in place following the recent continuation pattern.

Chart 3. ADYEN NA at a new relative low, with the break below support at 1311.t suggesting further downside in absolute terms.

Chart 4. ASML NA at a 52-week relative low and has scope for further underperformance following the break to new lows below the yellow neckline of a continuation pattern.
